Pickup colors and options

HUMBUCKER COLORS

DiMarzio® full-sized humbuckers come standard in black but are also available in cream or in black & cream at no additional charge. Many humbuckers are also available in custom colors such as blue, green, pink, red, purple, white, yellow or combinations of these colors at a \$10 higher List Price, or in Camouflage at a \$30 higher List Price. See website for available colors on all models. Most humbuckers are available with chrome, black or gold polepieces. See website for standard color. Alternate polepiece colors when available are at a \$10 higher List Price. NOTE: The Virtual PAF™ and Virtual Hot PAF™ come in high gloss finish. All other full-size humbuckers come in satin finish.

CHROME TOP™ HUMBUCKERS

DiMarzio humbuckers with 12 polepieces are available with Chrome Tops™, a veneer of solid metal bonded to the tops of the coils, hand polished to a mirror finish and heavily plated to the same standards as fine jewelry. The solid metal surface is as tough and durable as a traditional metal pickup cover but gives you the modern look of uncovered pickups. Add \$75 to List Price for Chrome Tops™. Also available in Gold Tops™. NOTE: Chrome Tops™ and Gold Tops™ are not available on X2N® or D Sonic™ models or on 7-string humbuckers

COVERED HUMBUCKERS

Air Norton™, Air Zone™, Bluesbucker®, EJ Custom™, Norton®, PAF®, Tone Zone®, Virtual PAF™ and Virtual Hot PAF™ are available with a factory-installed metal cover in bright nickel, gold or raw nickel-silver for an additional charge of \$23 List Price. Metal covers are not an option on other models.

F-SPACING

F-spacing refers to a wider spacing between pole pieces for improved alignment with the strings on most guitars with tremolos and many newer fixed-bridge instruments. All DiMarzio full-sized humbuckers are available in standard spacing or F-spacing at the same price. For proper string alignment, F-spaced humbuckers should be used in the neck or bridge position when the distance between the high and low E strings measures 2 inches (51 mm) or greater over the pickup. Please specify “F-spaced” at the time you place your order. The X2N® comes in one spacing for all guitars.

COLORS ON OTHER MODELS

Unless otherwise noted, the standard color for all pickups is black except for Strat® replacement pickups which are white. Some Strat® replacement models are available in optional colors such as black, cream, aged white, mint green, blue, green, pink, purple or yellow at no additional charge, or in Camouflage at a \$20 higher List Price. See website for available colors on each model.

POLARITY

Blue Velvet™, Red Velvet™, Class of '55™, Twang King™, FS-1™, SDS-1™, Pre B-1™ and DiMarzio Soapbar™ are all available with reversed polarity and connections at no additional charge. Please specify this option if desired when placing your order.

STRAT REPLACEMENT MODELS WITH NO FLANGE, NO STAGGER or LEFT HANDED

All models for Strat® replacement are available on special order without a “flange” – the triangle-shaped extension on the pickup base – or with no magnet stagger at a \$10 higher List Price. Left-handed magnet stagger is available at no extra charge.

ACCESSORIES

DiMarzio pickups come with mounting screws. Other installation accessories (springs, mounting rings, switches, pots, etc.) are available separately.
