Evan Taubenfeld Talks About His GTR Presets

In general, the L and Rs are usually meant to be used to separate passes of the same part, like doubling a lead, rhythm, or octave. I like to change mics or toggle the tone slightly for those L and R parts.

Basically, what I do is use **Rhythm** L and R for separate passes of identical parts, and then hard pan them 100% L and R. Then I'll go back over them with the **Thickener** L and R and hard pan them 100%. (Usually I only use this on the chorus).

The **Bari Punch** and **Bari Thump** presets are meant to be used up the middle to add emphasis to parts, hits, or choruses.

Brit Strum is nice for cutting tones, like Oasis or Third Eye Blind. Great for strum-y parts that still break up nice.

Octaves get panned L and R for the separate passes of identical parts, about 75-85%, depending on the mix, and are used for adding voicing, cut, and high end.

Picker Cut L and R are good for lead parts (panned about 80%) as well as high note repetitive parts or general "lead" sounding parts.

Picker Glass is similar, but glassier, a more well-rounded, warmer version, better for songs that are less heavy.

How To Install

Click the **Load** button located on the top toolbar of the GTR Amp, and direct the open dialog to **GTR Taubenfeld Presets.xps**, enclosed in this zip file.

To install the presets so you can load them from the presets pop-up menu on the GTR3 Preset page:

- **Mac OS X**

Copy the **GTR Taubenfeld Presets.xps** file to
Applications/Waves/Waves Plug-Ins/WavesGTR/Presets/GTR/...

- **Windows**

Copy the **GTR Taubenfeld Presets.xps** file to
Program Files/Waves/Plug-Ins/WavesGTR/Presets/GTR/...

Enjoy,
